

# VBIK - NYTT

## Club Meeting on Aug 31, 2023

Number 7

Västerbergslagen Engineering Society

August

### ***From old print shop to modern HVDC factory***

Join us visiting HVDC Hitachi Energy's new production site in Smedjebacken, where thyristor valves for classical HVDC and SVC are assembled, together with IGBT valves for FACTS.

The former print shop has been transformed into a modern HVDC factory and was inaugurated in November last year and the production is now in full swing. The factory houses 65 employees and valve component assembly in a space of totally 2,500 m<sup>2</sup>.

Our guides will present HVDC and HVDC production and guide you through the factory and all will finish with mingle over a sandwich and beverage with Hitachi Energy's compliments.

**Limited participation: three groups of 10 persons each.**

**At registration please state name(s) and preferred language: SWE, ENG or SWE/ENG!**

**First come, first served at registration!**

Not member yet: Please apply at <https://vbik.se/ehome.php>

---
